Development: JavaScript, TypeScript, Python, Java, HTML, CSS, SQL; React, Electron, Node.js, FastAPI.

Web and integrations: HTTP APIs, JSON, WebSockets, OAuth; browser extensions (Manifest V3) and service workers.

Testing and tools: pytest, Git, GitHub Actions; Blender (3D); AI-assisted development (Codex, Claude, ChatGPT).

Customer support: active listening, troubleshooting, case notes and follow-up, teamwork.

PERSONAL PROJECTS

- **Aurora:** built a Windows calendar with recurring alarms, iCloud/Google sync, Gmail event imports and sports schedules. GitHub
- **PC Remote:** developed a phone-based Windows PC controller with secure PIN pairing and automated tests. GitHub
- **Hypertrophy:** built an offline workout PWA with tailored plans, progress tracking and JSON backups. GitHub
- **Travian Extensions:** published eight Manifest V3 browser extensions for alerts, ranking history and planning, with versioned releases. GitHub
- **BMW M4 ADRO Kit:** co-created a Forza Horizon 6 vehicle mod with 15,000+ downloads, contributing Blender 3D modelling. Nexus Mods

PROFESSIONAL EXPERIENCE

Customer Service Representative | Teleperformance Portugal — Aug 2021 – Jun 2022

Meta Business Support · Remote

- Supported English-speaking business clients with Facebook and Instagram advertising, account and platform queries.
- Reached customer satisfaction (CSAT) of 90%+ through clear communication and structured call handling.
- Explained platform policies and advertising guidelines in language suited to each client.
- Kept detailed case notes for consistent follow-up and smooth handovers between shifts.

Customer Service Representative (temporary) | Majorel — Sep 2020 – Aug 2021

Bolt customer support

- Helped Bolt riders and drivers with trips, payments and account issues before moving to Teleperformance.
